Notes to the Condensed Consolidated Interim Financial Statements
For the three and nine months ended July 31, 2015 and 2014
(Unaudited)

1. DESCRIPTION OF BUSINESS

Silver Spruce Resources Inc. (the “Company”) is a public company domiciled in Canada and was incorporated in Alberta on May 8, 1996 under the name First Labrador Acquisitions Inc. The Company changed its name to Silver Spruce Resources Inc. on October 22, 2004. The Company's operations consist of the exploration for precious and base minerals. The registered office of the Company is Suite 312, 197 Dufferin Street, Bridgewater, Nova Scotia, B4V 2G9.

2. BASIS OF PREPARATION AND GOING CONCERN

Statement of compliance

The condensed consolidated interim financial statements (the “financial statements”) of the Company are unaudited and have been prepared in accordance with IAS 34, Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the IFRS Interpretations Committee (“IFRIC”). In preparing the interim financial statements, the same accounting principles and methods of computation have been applied as in the annual financial statements for the year ended October 31, 2014. In the opinion of management, all adjustments necessary for a fair presentation of the financial position, results of operations and cash flows for the interim periods have been made.

These condensed consolidated interim statements should be read in conjunction with the Company's consolidated annual financial statements for the year ended October 31, 2014.

Basis of presentation

The condensed consolidated interim financial statements of the Company have been prepared in accordance with IAS 34 on a going concern basis, under the historical cost convention except for investments which are reflected at fair value which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. Several adverse conditions, however, cast substantial doubt on the validity of this assumption. The Company does not have any proven economically recoverable reserves on the Company's interest in mineral properties held for exploration and to date; the Company has earned no direct mining related revenues. The Company's assets are subject to increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and restrictions, and political uncertainty.

The recoverability of the amounts shown for mineral exploration properties is dependent upon the existence of economically recoverable reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain necessary financing to complete the development, and upon future profitable production. It is not possible to predict whether financing efforts will be successful. The amounts shown as mineral exploration properties represent net costs to date and do not necessarily represent present or future values.

Although the Company has taken steps to verify title to mineral exploration properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers, First Nations claims, non-compliance with regulatory and environmental requirements and may be affected by undetected defects.

(Unaudited)

2. BASIS OF PREPARATION AND GOING CONCERN (continued)

Basis of presentation (continued)

While the financial statements have been prepared on the basis of accounting principles applicable to a going concern, adverse conditions such as ongoing operational losses and a need for working capital cast significant doubt on the validity of this assumption. These financial statements do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying consolidated financial statements. Such adjustments could be material. The Company had continuing losses during the period ended July 31, 2015, a working capital deficiency and a cumulative deficit as at July 31, 2015. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

3. SIGNIFICANT ACCOUNTING POLICIES

These condensed consolidated interim financial statements are prepared in accordance with IFRS and follow the same accounting policies and methods of their application as the most recent audited financial statements for the year ended October 31, 2014. These financial statements should be read in conjunction with those consolidated financial statements.

4. FUTURE ACCOUNTING CHANGES

IFRS 9 *Classification and Measurement* ("IFRS 9") introduces new requirements for the classification, measurement and de-recognition of financial assets and financial liabilities. Specifically, IFRS 9 requires all recognized financial assets that are within the scope of IAS 39 *Financial Instruments: Recognition and Measurement* to be subsequently measured at amortized cost or fair value. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted. The Company is currently assessing the impact of this new standard on the Company's financial assets and financial liabilities.

During the year ended October 31, 2014, the Company adopted a number of new IFRS standards, interpretations, amendments and improvements to existing standards. These included IFRS 10, IFRS 11, IFRS 12, IFRS 13, IAS 32, IAS 36, and IAS 39. These new standards and changes did not have any material impact on the Company's financial statements.

IAS 1 *Presentation of Financial Statements* ("IAS 1") was amended in December 2014 in order to clarify, among other things, that information should not be obscured by aggregating or by providing immaterial information, that materiality considerations apply to all parts of the financial statements and that even when a standard requires a specific disclosure, materiality considerations do apply. The amendments are effective for annual periods beginning on or after January 1, 2016. Earlier adoption permitted.

SILVER SPRUCE RESOURCES INC.

Notes to the Condensed Consolidated Interim Financial Statements

(Unaudited)

4. FUTURE ACCOUNTING CHANGES (continued)

IAS 24 *Related Party Disclosures* (“IAS 24”) was amended to clarify that an entity providing key management services to the reporting entity or the parent of the reporting entity is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity. The amendments to IAS 24 are effective for annual periods beginning on or after July 1, 2014.

5. CAPITAL MANAGEMENT

The capital structure of the Company currently consists of share capital, warrant reserve and equity reserve. The Company’s objective when managing capital is to maintain adequate levels of funding to support the acquisition, exploration and development of mineral properties. The Company manages its capital structure in a manner that provides sufficient funding for operational activities.

The properties in which the Company currently has an interest are in the exploration and evaluation stage; as such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. Funds are primarily secured through equity capital raised by way of private placements. There can be no assurances that the Company will be able to continue raising equity capital in this manner. The Company invests all capital that is surplus to its immediate operational needs in short-term, liquid and highly rated financial instruments, such as cash and other short-term guaranteed deposits, all held with major Canadian financial institutions.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company’s approach to capital management during the period.

The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than of the TSX Venture Exchange (“TSXV”) which requires adequate working capital or financial resources of the greater of (i) \$50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of 6 months.

As of July 31, 2015, the Company may not be compliant with the policies of the TSXV. The impact of this violation is not known and is ultimately dependent on the discretion of the TSXV.

6. FINANCIAL RISK FACTORS

A summary of the Company’s risk exposures as it relates to financial instruments are reflected below:

a) Credit risk

The Company's credit risk is primarily attributable to cash and other receivables. The Company’s cash is held with highly rated financial institutions.

The Company has concluded that credit risk with regards to other receivables is minimal.

SILVER SPRUCE RESOURCES INC.

Notes to the Condensed Consolidated Interim Financial Statements

For the three and nine months ended July 31, 2015 and 2014

(Unaudited)

6. FINANCIAL RISK FACTORS (continued)

b) Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at July 31, 2015, the Company had a cash balance of \$14,398 (October 31, 2014 - \$116,938) to settle current liabilities of \$446,150 (October 31, 2014 - \$532,975) that primarily consist of accounts payable and accrued liabilities that are considered short-term and expected to be settled within 30 to 60 days. Since the Company does not generate revenue from operations, managing liquidity risk is dependent on the ability to secure additional financing.

c) Market risk

Interest rate risk

The Company's loans payable bear a fixed interest rate and therefore is not subject to interest rate risk. The Company invests any cash surplus to its operational needs in investment-grade short-term deposit certificates issued by highly rated Canadian banks. The Company periodically assesses the quality of its investments and is satisfied with the credit rating of the bank.

Foreign currency risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. Management believes the foreign exchange risk derived from currency conversions is negligible and therefore does not hedge its foreign exchange risk.

Price risk

The Company is exposed to price risk with respect to commodity prices. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

There were no significant changes to credit risk, liquidity risk and market risk during the period.

d) Fair value

The carrying amounts for cash, other receivables, trade payable and accrued liabilities, and loans payable on the statements of financial position approximate fair value due to their short-term maturity. The fair values of investments in entities listed on the TSX Venture Exchange are based on quoted market prices in active markets and are classified as a Level 1 in the fair value hierarchy.

SILVER SPRUCE RESOURCES INC.
Notes to the Condensed Consolidated Interim Financial Statements
For the three and nine months ended July 31, 2015 and 2014
(Unaudited)

6. FINANCIAL RISK FACTORS (continued)

d) Fair value (continued)

A three tier hierarchy is used as a framework for disclosing the fair value of financial instruments based on inputs used to value the Company's financial instruments. The three levels of the fair value hierarchy are:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities

Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 - Inputs that are not based on observable market data

e) Sensitivity analysis

The Company is exposed to foreign exchange fluctuations as a result of transactions with its subsidiary, Silver Spruce Resources Mexico S.A. de C.V. The Company does not use derivatives to mitigate its foreign currency risk.

The statement of financial position includes the following amounts expressed in Canadian dollars with respect to financial assets and liabilities for which cash flows are denominated in Mexican pesos.

	July 31, 2015	October 31, 2014
	\$	\$
Mexican Pesos:		
Cash	3,686	3,795
Trade payable	5,758	5,928

A plus or minus 10% change in the value of the Canadian dollar with respect to Mexican Pesos would affect the Company's net loss by approximately \$50 (October 31, 2014 - \$50) based on balances denominated in Mexican Pesos on July 31, 2015.

A plus or minus 10% change in the Company's investment in marketable securities as at July 31, 2015, would affect the Company's net loss by \$34 (\$338 x 10%) (October 31, 2014 - \$34).

11. SHARE BASED PAYMENTS

The Board of Directors of the Company has adopted a stock option plan for the Company. Pursuant to the plan, the Board of Directors of the Company may allocate common shares to its directors, officers and certain consultants. The aggregate number of stock options to be granted under the plan should not exceed 20% of the issued and outstanding capital of the Company and the aggregate number of shares reserved for issuance to anyone person shall not exceed 5% of the issued and outstanding common shares. The options are non-transferable and non-assignable and may be granted for a term not exceeding five years. The exercise price of the options is fixed by the Board of Directors of the Company at the time of grant, subject to all applicable regulatory requirements. The vesting period for options is set by the Company at the time the options are granted.
